

# The Game Changers

## in the world of proto-type assembly

A relatively young player in the field of Electronic Manufacturing Services, Podrain Electronics focuses on PCB Assembly & Rework for Prototypes.

As a natural extension, Podrain also provides System Integration and RMA Logistics for clients whose prototypes have grown to successful products.

## Podrain USPs

**Ability to deliver complex PCB Assembly in less than 72 hours\***

**State of the art equipment for assembly, inspection and testing**

**Complete cost transparency**

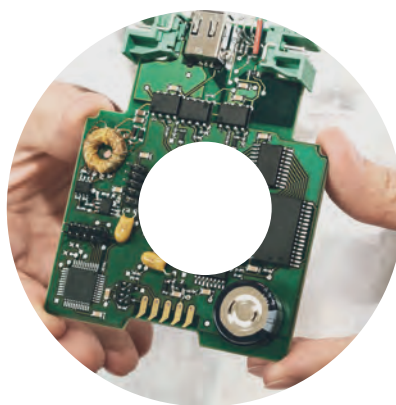

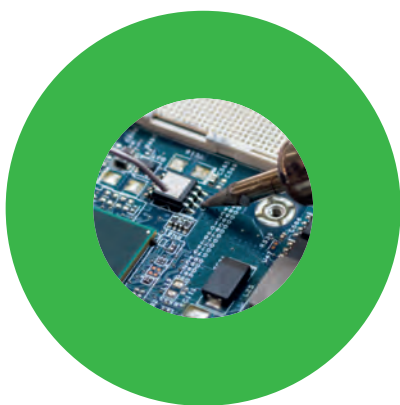

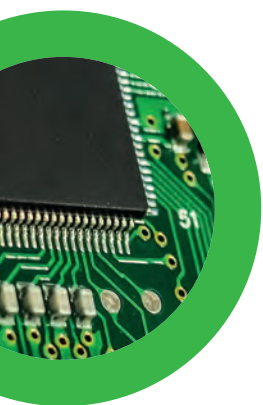

**Top quality assurance**

**Lead by industry experts**

\* 72 hours after the receipt of the complete kit

## The Spark Behind The System

Founded by Shyam Chandran and Rajesh Rajagopal with support from Singapore based Logical Steps LLP in 2017, Podrain has moved from strength to strength, working through the pandemic to support clients providing essential services in the healthcare and financial sectors.

Today, Podrain has a workforce of over 150 and is ISO 9001:2015 and AS9100D certified. ISO 13485 certification expected by March '22.

# Services We Offer

PCB  
Assembly

Quick Turn  
Rework & Reballing

System  
Integration

Conformal  
Coating

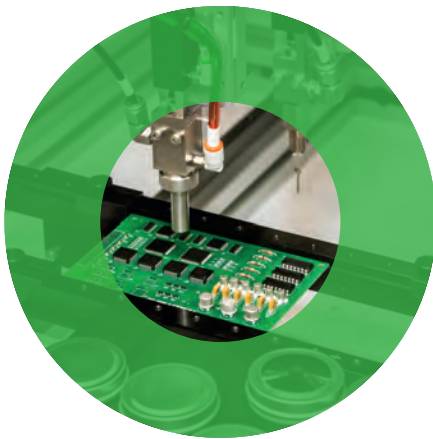

RMA Support  
& Logistics

Press-Fit  
Assembly

## We Have Invested In Top Of The Line

- Yamaha production line capable of placing components up to Chip (01005), BGA (0.25mm), LGA, QFN, DFN, QFP
- Fully Automatic Ball Grid Array Rework Station
- X-Ray Machine
